

# ***DreaganThing***

## Synopsis

Nan Klee

Set in the subterranean colonies of our moon, *DreaganThing* is the sequel to *DreaganStar*.

*DreaganThing* deals with the possibility that the spaceship's lunar materials have interacted with the *DreaganStar*'s sophisticated computer systems to create a conscious being. Jon Dreagan and Samantha Alexander continue to pursue each other, while stabilizing their own worlds of high level corporate politics and psychological troubleshooting of the overcrowded lunar population. Problems include a murder in the ice mines over the theft of oxygen, an assassination attempt on one of them, a lone Japanese colony revolting against their government to join the five Dreagan Corporation colonies.
